## ISMS, GRC, vCISO, Audit & VAPT

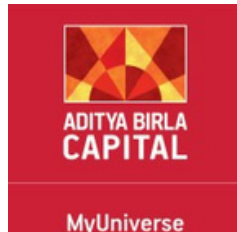

CipherBeam ISMS, GRC, vCISO, Audit and VAPT Service is designed for organizations that someone to take responsibility for the development and growth of the information security program and do not want to hire a Full-Fledged Team or function or role due to tight budget and tight schedule

- **IT Expertise at a Fraction of the Cost:** "Contracting a Service" is often far more cost-effective than hiring a full-time position to the organization where the companies face tight budgets and tight schedules.
- **Receive trusted advice:** Obtain the expert insight and impartial advice needed to set tactical and strategic cyber security improvements, budgets, and goals.
- **Achieve compliance:** Increased level of regulatory compliance through pragmatic advice and fast-track regulatory compliance.
- **Enhance business confidence:** Drive a business-led approach to security and Instil employee, customer, and partner confidence in the organization's cyber security posture.
- **Measure security effectiveness:** Help board members and other key stakeholders to quantify and understand the effectiveness of existing security policies, controls, and technology.
- **Identify real security improvements:** Gain assistance identifying and driving the security improvements that offer the greatest benefit to your business.
- **Reduce management overheads:** Avoid hefty recruitment fees and reduce your organization's payroll by engaging a dedicated security expert only when necessary.
- **Specialized Knowledge:** Increased reputation protection through engagement with highly experienced industry specialists.
- **Flexible Availability:** Increased efficiency through a flexible, agile resource solution and reduced costs through security skills engaged only when needed.
- **Clear Direction and focus:** Know where you are and where you are going on your security journey.
- **Stronger Relationships:** Build positive and secure relationships with management, clients, suppliers and other third parties.
